

ALBERTO MARANGELO

Technical Lead – Architecture & Software Development

Web applications, Node.js backend, sys integrations, security and long-term maintenance

INFO

Technical consultant with experience in designing, building and maintaining complex digital systems for business use.

Specialized in web architectures, Node.js backend systems, service integrations, application security and long-term system evolution.

End-to-end project ownership: from technical analysis and architectural decisions to production deployment and ongoing support.

Technical professional with direct responsibility for system architecture and evolution, able to collaborate with design, product and business while maintaining technical control.

Current focus on modular architectures, proprietary frameworks, and research and development on advanced software systems.
